Zinc-Rich Cold Galvanizing Compound

CORIUM 888

Zinc-Rich Cold Galvanizing Compound

- Zinc-rich coating, tough & long-lasting corrosion protection for iron/steel & galvanized metals.
- Remarkable self-healing mechanism.
- Protects the base metal even when the coating is penetrated or scratched.
- Excellent resistance against water and heat.
- Single pack system for ease of application.

SPECIAL FEATURES

Corium 888 Zinc-Rich Cold Galvanizing Compound is engineered to provide the best possible long-term protection, for a single pack coating, to iron/steel equipment, parts and components exposed to aggressive environments.

- Corium 888 contains at least 92% metallic zinc (in dry film) for optimal galvanic action that cost-effectively prevents rust from developing.
- Corium 888 provides a “self-healing” mechanism that automatically and effectively reseals any scratches on the coating.
- Corium 888 provides the equivalent protection of Hot Dip Galvanize with ease of preparation and application.

OUTSTANDING PROPERTIES

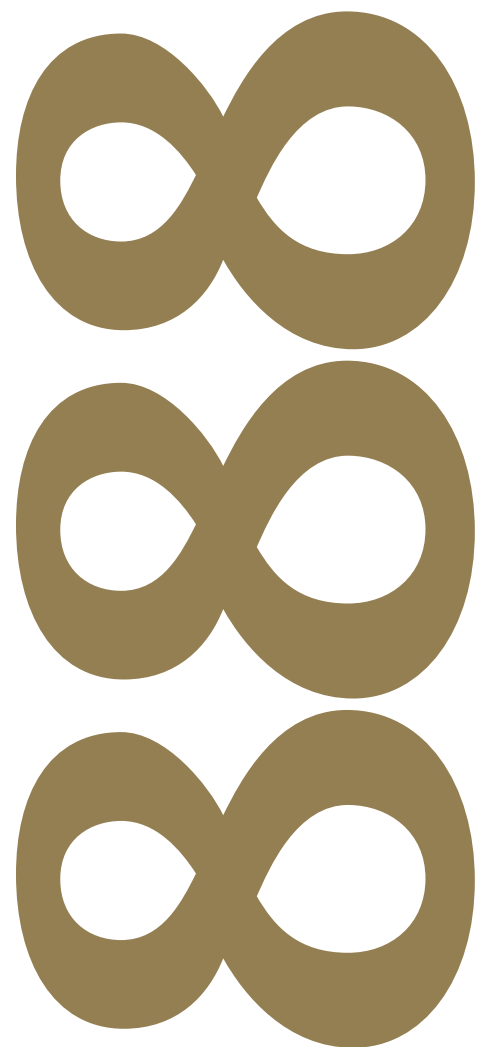

Corium 888 Zinc-Rich Cold Galvanizing Compound offers long-term corrosion protection combined with the following outstanding properties:

- Outstanding resistance against hostile operating conditions such as water splash and heat up to 150°C.
- Ready and easy to use single pack compound – no mixing is required, thereby reducing risk of improper mixing and wastage.
- Quick dry time – 20 minutes to touch and 8 hours to recoat.
- Available in aerosol and bulk packs for various methods of applications.

USE FOR

Corium 888 Zinc-Rich Cold Galvanizing Compound is highly recommended for the maintenance and restoration of new and damaged galvanized metal, welding repairs, steel/iron structures and exterior surfaces subject to severe corrosion and rust conditions.

For a bright galvanized appearance on treated surfaces, topcoat with **Corium 878 Anti-Corrosion Coating “Bright Silver”**.
