SPECIAL FEATURES

Magna 55 Superior Alloy for Aluminum makes it possible for anyone who can braze to weld aluminum.

- **Magna 55** is the universal alloy that welds all types of aluminum – both cast and sheet.
- **Magna 55** is made of highly alloyed materials that prevent base metal sagging, collapsing or even wrinkling.
- **Magna 55** offers a unique two-stage melting range for both thin-flowing and build-up applications. Gives a professional finish.

OUTSTANDING PROPERTIES

Magna 55 is the superior alloy for aluminum that:

- Can be applied at lower temperature than base metal melting point to prevent collapsing of work piece.
- Gives extremely high tensile strength.
- Provides perfect color match, with good corrosion resistance.
- Can be applied in all positions.

USE FOR

- Sheet Aluminum
- Cast Aluminum
- Extruded Aluminum
- Wrought Aluminum

Colour of weld same as base metal without pin holes.

Can be used for build up of missing parts as well as joining

Base metal has not wrinkled or warped.

REMEMBER :
MAGNA 55 FLUX

give you optimum results.
